Educator, Teach For India Alumni

@poonams_diary

As an educator, I am thrilled to share my perspective on the children's climate change book, "Kuki and Mani's Climate Quest" It's evident that a considerable amount of thought and care went into its creation by Reshuka. The content is not only informative but also tailored in a children-friendly manner, making complex environmental concepts accessible to young minds. The design and illustrations of the books are amazing which I am sure every child will enjoy. It enhances the learning experience, providing visual reinforcement to the concepts discussed. The book stands out for its unique approach to conveying facts about climate change. Instead of overwhelming children with doom and gloom, it skillfully introduces them to the importance of environmental stewardship through engaging narratives and relatable characters. The incorporation of age-appropriate language ensures that the material is both comprehensible and captivating for young readers. What sets these books apart is its commitment to fostering a sense of responsibility among children.

@kukiandmani

Why parents & educators love our book series?

Here are the thoughts of parents regarding our books.

Benefits of Integrating Climate Change Education in School Curriculum

Enhanced Awareness

Integrating climate change education in school curriculum raises awareness about the environment and encourages students to adopt eco-friendly practices.

Empowering Students

Engaging with climate change education empowers students to become environmental advocates and lead sustainable initiatives in their communities.

Academic Development

Studying climate change fosters critical thinking and problem-solving skills, contributing to students' overall academic growth.

Social Impact

Educating students about climate change promotes a sense of responsibility towards the environment, fostering a sustainable and eco-conscious society.

Opportunities @ Schools

1. Reading clubs & Eco-clubs
2. Inspire project-based learning
3. Promote STEM learning
4. Discussions and debates
5. Expand classroom resources
6. Support literacy initiatives

Our offerings: Plan A

We are excited to announce our new school partnerships program!

Economy:

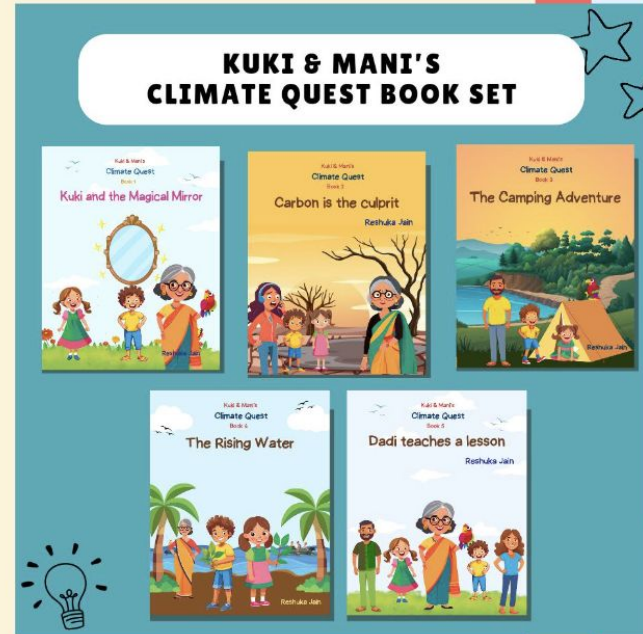

5 x 5 books set: Rs. 4000 and 1 author visit

Standard:

5x 5 books set : Rs.5000, 2 author visits, 2 workshops

Premium:

10 x 5 books set: Rs. 10000, 5 author visits, 5 workshops, curriculum design support

Our offerings: Plan B

We are excited to announce our new school partnerships program!

Stalls & display booths

We propose setting up engaging stalls and exhibits to showcase our acclaimed climate change book series during your school events. This offers benefits for parents, students, and teachers.

Engaging Students: Interactive Activities and Workshops

Additional offerings from us

Author Visits

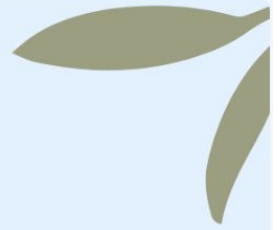

Bring climate education to life through interactive author visit! The author will read from their captivating short stories and engage students in discussions about real-world climate solution.

Educational Workshops

Workshops will be conducted to promote active learning, encouraging students to express their thoughts, ideas, and solutions related to climate change.

Guest Speaker Sessions

Inviting guest speakers will offer students the opportunity to learn from experts, inspiring them to take an interest in environmental topics.

Future Collaboration Scope

Customisation for schools

Curriculum Integration

Developing a comprehensive plan for integrating the book series into school curriculums, ensuring that it aligns with educational standards and learning objectives.

Teacher Training

Providing training and resources for educators to effectively incorporate the book series into their teaching methods, maximizing its educational impact.

Student Engagement

Implementing initiatives to actively involve students in the learning process, creating a supportive ecosystem for climate change education.

Conclusion: Empowering the Youth to Make a Difference

Inspiring Action and Change

Youth Empowerment

Empowering the youth to be proactive in addressing climate change issues, instilling a sense of responsibility and leadership in environmental conservation efforts.

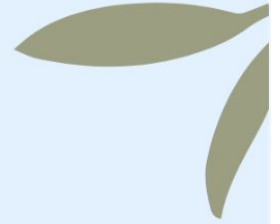

Call to Action

Encouraging young students to take positive actions in their communities, creating a collective movement towards sustainable practices and environmental stewardship.

Impact Assessment

Assessing the impact of the book series and the educational initiatives, highlighting the progress made in promoting climate change education among young students.
